# REJLERS INDUSTRY ADVANCED SOLUTIONS

#### Plant Information Management

- Administration services for Engineering IT systems
- Accelerated Documents
  - Document management services
- Accelerated Operations 360
  - A photo model service developed by Rejlers Finland
- Digital TECH+

### RIKU HALME Business Line Director, Advanced Solutions

Before joining Rejlers I was with the following major companies:

- Foster Wheeler for 20 years
- AECOM for 5 years
- Neste for 5 years

Throughout my career, I have contributed to the execution of power plant projects across the globe. Project scopes have varied from retrofit projects to greenfield EPC projects. Also, many of the projects have required considerable global coordination of the extended engineering centers.

In recent years, I have worked in a PMO organization in EM, PM and Portfolio Manager roles for petrochemical project deliveries in Finland and in continental Europe.

Engineering IT has always been close to my heart. I take pride in improving the project and engineering processes for Rejlers and for our customers.

### USE CASES & REFERENCES

⊿REJLERS

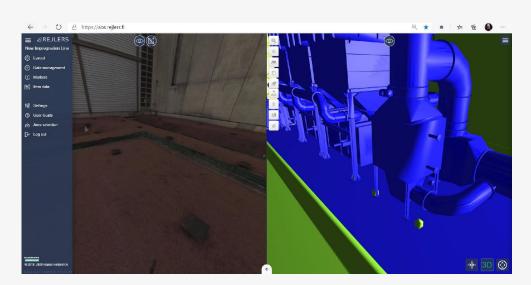

### UTILIZING THE SERVICE IN PROJECTS CUSTOMER CASE – REJLERS

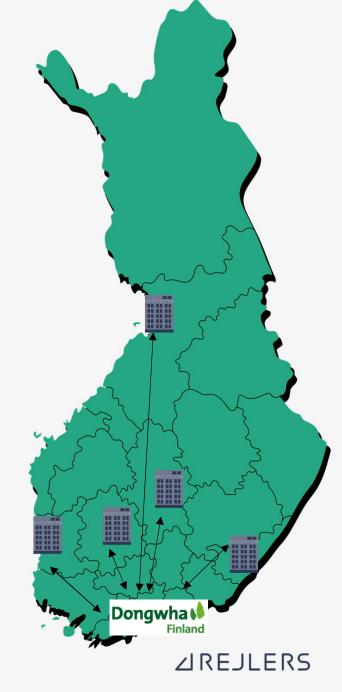

- 1. Rejlers PM mobilizes during the proposal phase creating a model. The 360 service replaces the traditional photos and goes way beyond. All our offices have a 360 camera.
- 2. All discipline leads have the model available resulting better and more accurate estimates.
- 3. During the project execution phase all stakeholders have the same view w/o visiting the project site!

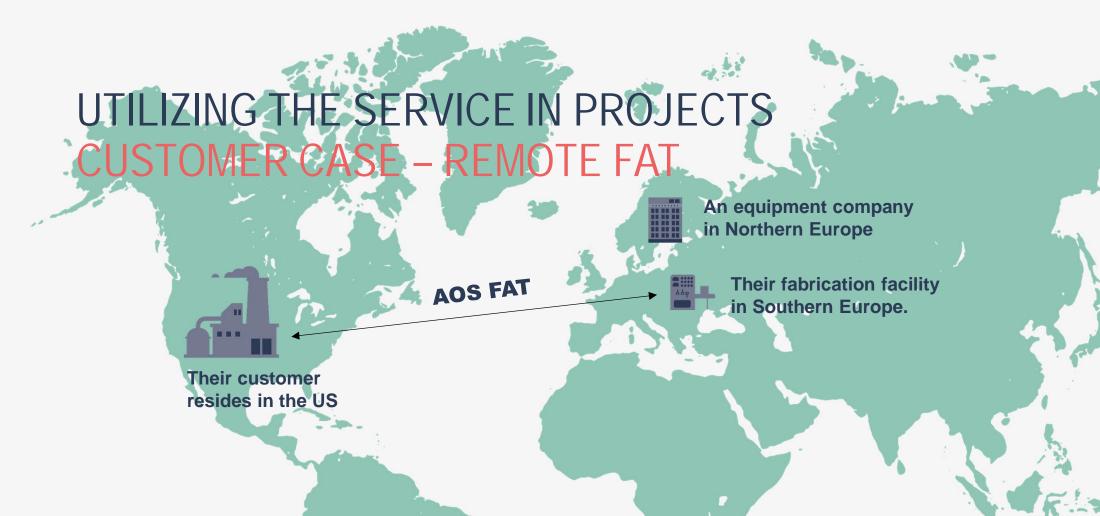

# UTILIZING THE SERVICE IN PROJECTS CUSTOMER CASE – REJLERS

- 1. Site visits are restricted in frequency, number of visitors and duration due to Covid-19.
- 2. One person shoots a new set of 360 photos weekly. Model is refreshed accordingly.
- 3. All stakeholders obtain an up-to-date view

#### Rejlers' AOS Solution:

The customer conducted the Factory Acceptance Tests in the AO Service. All observations were noted into the model.

# UTILIZING THE SERVICE IN PROJECTS CUSTOMER CASE – REMOTE PROJECT SITE

A European company had a prospect in Australia.

They couldn't travel to the site due to Covid-19. Their local rep visited the site and took pictures.

A model was built and the entire project team gained a view to the project.

**UREJLERS** 

#### Rejlers' AOS Solution:

The model was used for the detail planning and communication starting from the proposal phase.

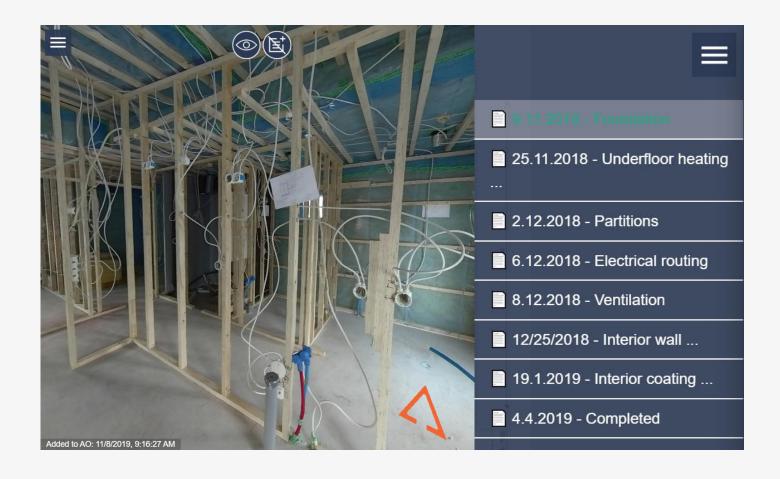

# UTILIZING THE SERVICE IN PROJECTS CUSTOMER CASE – IOT DASHBOARD

IoT concrete humidity sensors may be viewed within the service to determine when the linoleum flooring may be applied.

# UTILIZING THE SERVICE IN PROJECTS CUSTOMER CASE – TIME LAPSE

Capture all milestones in your project

You may always go back in time and see what's behind the drywall

# ACCELERATED OPERATIONS 360 DEMOS

#### Tank farm

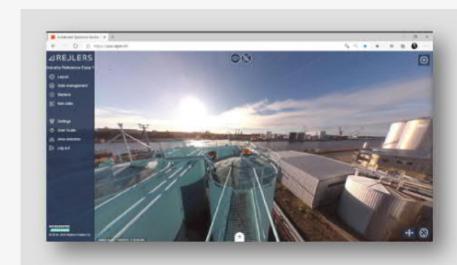

Main benefits to be shown:

- Project execution planning
- Eliminate site visits

#### Power plant turbine hall

Main benefits to be shown:

- Maintenance planning
- Observations

### ACCELERATED OPERATIONS AGILE AND AFFORDABLE EQUIPMENT

Standard 360 camera equipment about 1 000 €

- Extremely portable
- Available at your local consumer electronics store

⊿REJLERS

**Shoot photos** 

Process the photos and build a model

Hands-on training will be provided at the same time

### ACCELERATED OPERATIONS 360 SUMMARY

- Agile and affordable service and equipment
  - Model can be created and launched in a matter of hours
  - Monthly service fee 400 € takes you a long way
  - Camera equipment about 1 000 €
- Eliminates travel, fights Covid-19
- Data portal and observations
- Combined views
  - Photo model
  - Engineering model
  - Point clouds
- Hit the ground running with our Quick Launch Pilot!
